firefight
series

FIRE HT 04 Composite

Made of
composite fiberglass

PA
Protective Equipment

We are introducing the firefighter helmet of tomorrow. It is designed to protect the head in the most extreme conditions. Development and implementation of new composite technology in combination with established design enable full protection even at shorter (flash over flames) temperature exposures, reaching up to 1000 °C. These advantages are rounded up with extreme lightweight (1.350 g) and such design that supports a wide selection of compatible accessories. Structural firefighting has never been safer.

Highest temperature resistance and ultimate protection against mechanical impacts is enabled using composite fibertechonology.

Standard colors:

- red
- yellow - green *
- yellow - orange
- yellow
- white

* optional photo luminescence

Key features:

- Lightweight of only 1.350 g (including visor face shield and neck protector)
- Extreme temperature resistance (up to 1.000 °C) in a 10 seconds flash over flames
- Long-term resistance to 250 °C / 30 min, radiant heat test 14 KW / m2
- More resistant to mechanical impacts than any standard helmet
- Latest European standards conformity (EN 443/2008)
- Full head protection, including neck and face
- PES anti-scratch and anti-fog coated visor resistible to up to 300 °C (EN 14458)
- Aluminized carbon-fibre neck protection
- Interior shock absorber made of polyurethane foam
- Integrated adjustment system (ranging from 52 – 63cm)
- Interior ventilating channels enable safe and comfortable work
- Luminescent and reflective tapes visible from all sides and in all conditions
- Nomex chinstrap - tested to prevent skin irritations

Adjustment system with triangle connections and a quick release button.

Ready to use with a mask

Optional dark visor

Optional lamp integration

Flip down face visor

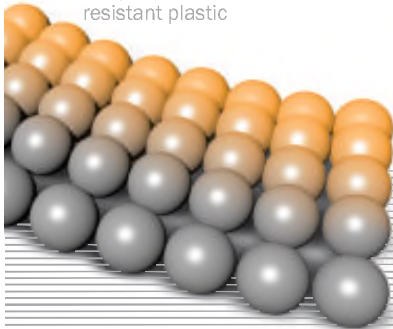

Removable aluminized carbon-fibre neck protector

Optional accessories

FIRE 03

Made of high temperature resistant plastic

Standard colors:

- red
- yellow - green *
- yellow - orange
- yellow
- white

* optional photo luminescence

PA
Protective Equipment

Established and worldwide approved design in combination with uncompromising choice of materials and manufacture technology. The latter is designed in a way that enable full head protection in extreme conditions, such as the professional firefighters are exposed to at structural firefighting. Supreme relation between performance and price together with wide spectre of optional upgrade – it can only be FIRE 03 – protection for a wide circle of professionals.

Excellent isolation features are shown at existing temperature strains. At 140°C / 30 min interior temperature remains below 50°C.

Key features:

- Flame retardant high temperature resistant copolymer plastic
- Long-term resistance to 140°C / 30 min, 250°C / 15 min
- European standards conformity (EN 443/1997)
- Full head protection, including neck and face
- Polycarbonate anti-scratch and anti-fog coated visor (EN 166)
- Removable neck protector made of genuine leather (optional aluminized carbon-fiber)
- Interior shock absorber made of polyurethane foam
- Integrated adjustment system (ranging from 52 – 62cm)
- Interior ventilating channels enable safe and comfortable work
- Luminescent and reflective tapes visible from both sides and in all conditions
- Nomex chinstrap - tested to prevent skin irritations
- Established and worldwide approved design
- Ready to use with a full face mask

Adjustment system with triangle connections and a quick release button.

Ready to use with a full face mask

Optional dark visor

Optional lamp integration

Flip down face visor

Removable neck protector made of genuine leather

Optional accessories

COMPACTA

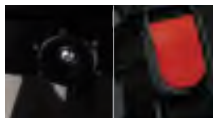

Standard colors:

- red
- yellow - green *
- yellow - orange
- yellow
- white

* optional photo luminescence

Adjustment system with triangle connections and a quick release button.

Made of high temperature resistant plastic

Widely used helmet for professional & semiprofessional firefighting, offering high standard of protection and comfort with accessories that further widen the possibility of customization.

Key features:

- Flame retardant high temperature resistant copolymer plastic
- Long-term resistance to 140°C / 30 min, 250°C / 15 min
- European standards conformity (EN 443/1997)
- Polycarbonate anti-scratch and anti-fog coated visor
- Removable neck protector made of genuine leather (optional aluminized carbon-fiber)
- Interior shock absorber made of polyurethane foam
- Integrated adjustment system (ranging from 52 - 63cm)
- Luminescent and reflective tapes visible from both sides and in all conditions
- Flame retardant cotton chinstrap - tested to prevent skin irritations
- Ready to use with a full face mask

Optional accessories

Flip down face visor / optional dark visor

MINI COMPACTA

Standard colors:

- red
- yellow - green *
- yellow - orange
- yellow
- white

* optional photo luminescence

Adjustment system with triangle connections and a quick release button.

Made of high temperature resistant plastic

The helmet is designed for the specific use in wildland firefighting situations. High degree of protection, simple usage at affordable price are the reasons for its popularity among the firefighting units around the world.

Key features:

- Flame retardant high temperature copolymer plastic
- Long-term resistance to 140°C / 30 min, 250°C / 15 min
- European standards conformity (EN443/1997)
- Removable neck protector made of genuine leather (optional aluminized carbon-fiber)
- Interior shock absorber made of polyurethane foam
- Integrated adjustment system (ranging from 52 - 63cm)
- Luminescent and reflective tapes visible from both sides and in all conditions
- Flame retardant cotton chinstrap - tested to prevent skin irritations
- Ready to use with a full face mask

Optional accessories

COMPACT III FF

Standard colors:

- red
- yellow - green *
- yellow - orange
- yellow
- white

* optional photo luminescence

Optional spinning-click button

Equipped with Quick release button

Made of high temperature resistant plastic

Extremely light, affordable and universal helmet with integrated flip-down visor. Designed for outland and wildland firefighting, rescue service activities and industrial protection.

Key features:

- Flame retardant high temperature copolymer plastic
- Long-term resistance to 140°C / 30 min, 250°C / 15 min
- Standards conformity EN 397 and NFPA 1977
- Polycarbonate anti-scratch and anti-fog coated visor
- Removable neck protector made of genuine leather
- Adjustable size (ranging from 52 - 63cm)
- Luminescent and reflective tapes visible from both sides and in all conditions
- Flame retardant cotton chinstrap - tested to prevent skin irritations
- Ready to use with a full face mask

Flip down face visor / optional dark visor and aluminized carbon-fiber neck protector

Optional accessories

ACCESSORIES

Wide selection of approved and high quality accessories widens the scope of use and enable individual configuration.

Fire lamp holders

Aluminized carbon-fibre neck protectors

Goggles with additional fastening possibility

Chin shield

Fire lamp / eLED or Xenon (waterproof 10 m)

PA Protective Equipment

Company PAB was established in 1953 and has over the decades grown into a high tech developer and manufacturer of protective helmets and body safety gear. Through its commitment to consistent quality, continuous close relationship with the firefighting professionals and remarkable talent in engineering, PAB has become one of the leading edge manufacturer of reliable body safety gear worldwide.
