

FILTERING DEVICES

SEKUR ESCAPE

Sèkur esCAPE is an escape device with filter that protects respiratory organs, eyes and face against hazardous substances and smoke developed in the event of fire. Sèkur EsCAPE has been approved in accordance with EN 403.

MAIN FEATURES

- The hood is made of a thin polyimide film, resistant to heat, high temperatures and flame. Its special colour let wearers be visible even in the presence of smoke. The transparency of the hood allows a distortion- and aberration-free vision. All materials are heat and flame resistant, and grant the device a high impact resistance.
- Sèkur esCAPE is an escape device equipped with a mouthpiece and a nose clip, that allow a high degree isolation of the wearer in a contaminated environment.
- Sèkur esCAPE is recommended to protect respiratory organs from dust, gases and vapours, which may be given off in the event of fire. The combined filter protects the user from P2 dusts, acrolein, HCl, HCN and carbon monoxide also in high concentrations (until 10000ppm of CO). The protection against particles, gas and vapours is guaranteed for 15 minutes. This device is for a single use only.
- Total weight is of about 500 grams.

STORAGE

- Sèkur esCAPE, in its original packaging, can be stored in environments with temperature between 0°C and 50°C, also in the presence of humidity.

SHELF LIFE

- Shelf life of Sèkur esCAPE is 6 years, that can be extended by 6 more years after replacing filter and rubber components.

DONNING AND USING

- The opening is simple and fast, the donning is instinctive, in order to immediately isolate the user from the external polluted environment.
- Sèkur esCAPE has a sealing system that verifies that no tampering, falls or accidental openings may have occurred, which may reduce or make void the protective capacity of Sèkur esCAPE.
- The device is available without hanging clip or with single or triple anchor on the wall.
