

Wheel Breathing Apparatus with a long tube

PRODUCT DETAILS:

Stainless steel trolleys: stainless steel frame reinforced anti-corrosive, can be equipped with the foot brake devices. Medium pressure pipe: the main conduit pipe 30 meters long, two branch pipe each 10 m length, medium pipe total length of the pressure catheter may be extended to 90 meters or more in accordance with demand, gas is still comfortable and smooth.

4 bottles of 6.8 liters of carbon fiber, valves, 2 valve and two full face mask and other components. There are six liters, 6.8 liters, 9 liters, 12 liters cylinders. Features: supply 2 people, to ensure that work long hours. Gas supply can be replaced without affecting the work, saving time.

Technical Parameter		4 Cylinder Devices	2 Cylinder Devices
Air Cylinder	Material	Carbon Fibre Cylinder	Carbon Fibre Cylinder
	Water Volume	6.8L	6.8L
	Working Pressure	30MPa	30MPa
	Quantity	4	2
	Inhaling Resistance	≤500pa	≤500pa
	exhalation Resistance	≤1000pa	≤1000pa
Alarm Apparatus	Alarm Pressure	5.5±0.5MPa	5.5±0.5MPa
	Alarm sound level	90dB	90dB
Medium Pressure Pipe	Length	50M	50M
